## Preface

### Prerequisites:

Before diving into the usage of your anti-theft device and its accompanying application, ensure that you have the following:

- The anti-theft device itself.
- A smartphone with Bluetooth capability.
- Access to the internet.
- Two possible methods of connection: NFC or camera.

### What you have access to:

Upon acquiring the anti-theft device, you will also receive:

- A battery charger.
- Access to the dedicated application.
- A QR code provided with the device's packaging.
- A user manual to assist you in setup and operation.

### Purpose:

This user manual is designed to guide you through the setup, usage, and troubleshooting of your anti-theft device and its corresponding application. It aims to provide comprehensive instructions for both novice and experienced users.

### Content Overview:

#### 1. Device Information:

General information regarding the anti-theft device.  
Instructions for setup and operation.

#### 2. Application Information:

Overview of the application's functionalities.  
Guidance on navigating the application interface.

#### 3. General Information:

Supplementary details are applicable to both the device and the application.  
Tips and best practices for optimal usage.

### How to Navigate:

To assist you in finding relevant information efficiently, this manual utilises a colour-coded system:

- Dark grey sections contain general information.
- Purple sections focus on application-related details.
- Light grey sections provide device-specific information.

We encourage you to refer to the table of contents for quick access to specific sections of interest. Should you encounter any difficulties or have questions not addressed within this manual, please consult the FAQ section or reach out to our customer support team for assistance.

## Audience

This user manual is tailored to cater to the unique needs and interests of ski and snowboard enthusiasts, providing them with comprehensive guidance on utilising the anti-theft device to safeguard their equipment during exhilarating mountain adventures.

While initially focused on the ski and snowboard community, the manual's relevance extends beyond these activities, catering to anyone seeking to protect their belongings in various settings and scenarios.

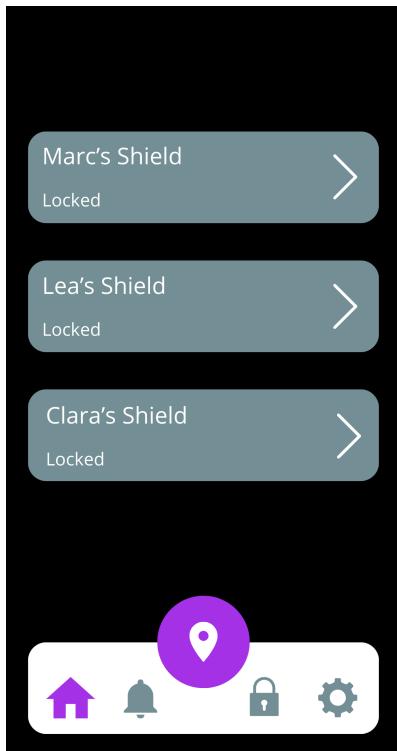

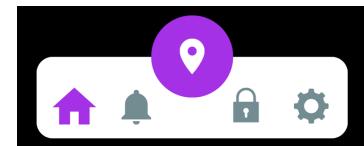

# SportShield Manual

## SportShield Application

Welcome to the user manual section dedicated to guiding you through the various tabs within our anti-theft application. Each tab serves a distinct purpose, offering you intuitive navigation and access to vital information about your protected belongings. Below, we delve into the functionalities of each tab, empowering you to make the most out of your anti-theft device and application.

Use this footer to navigate easily through the different tabs as you explore the anti-theft application.

### Homepage:

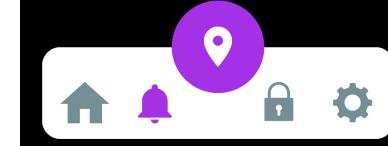

The homepage is your go-to destination to quickly locate all your activated devices.

It provides a centralised hub where you can effortlessly access information about your protected belongings with just a glance.

### Notifications

All the information transmitted by the anti-theft devices.

Ludo's Shield	zzz
The anti-theft device turned to sleep mode.	
Lea's Shield	wake
The anti-theft device is moving. The alarm is ringing.	
Lea's Shield	movement
The anti-theft device detected a movement.	
Marc's Shield	battery
The battery of the anti-theft device is running low.	

### Notifications:

The notification tab keeps you informed about every aspect of your device's status and activities.

- **zzz** : Related to the sleep mode and activation.
- **wake** : Related to the alarm and movements.
- **battery** : Related to the battery.

# SportShield Manual

## SportShield Application

### List of the devices:

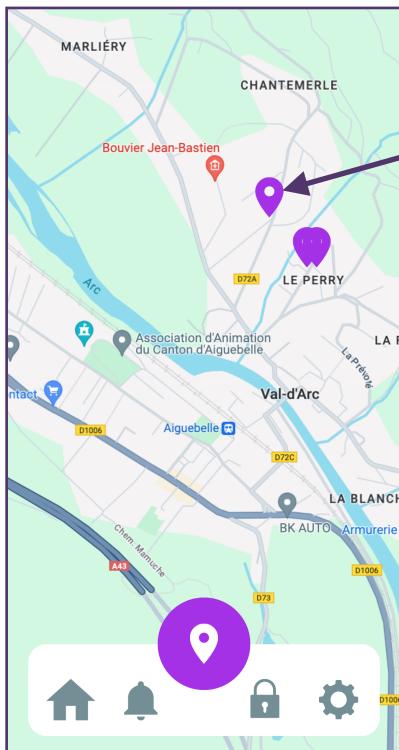

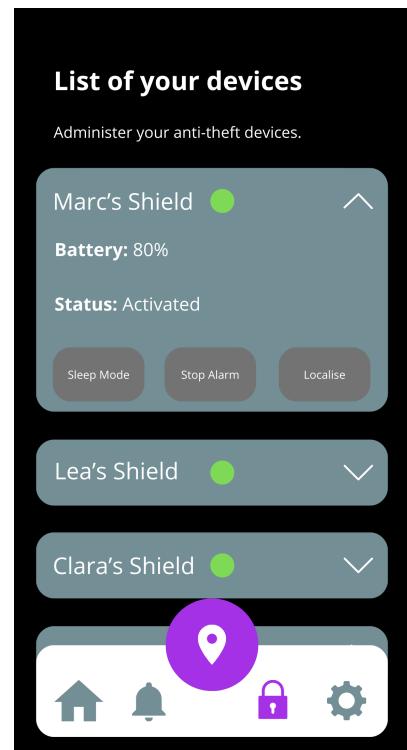

The list of device tab provides a comprehensive list of all your devices, including those that are currently inactive.

Upon selecting a device from the list, you'll gain access to essential details such as the battery percentage and current status.

Additionally, intuitive buttons allow you to take immediate actions, including silencing alarms, locating the device, toggling sleep mode, or activating it as needed.

From this tab, you have the convenience of adding a new device effortlessly.

*More information page 8.*

### Map:

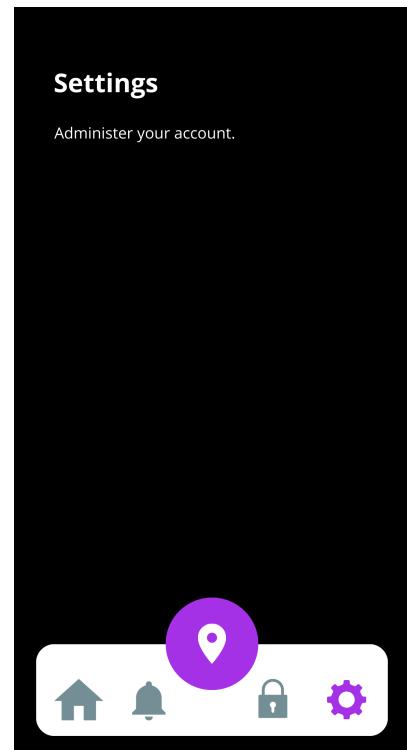

The map tab provides a visual representation of your location with pinpointing the whereabouts of each of your activated devices.

### Settings:

The settings tab, provides you the ability to administer your account and manage your device settings with ease.

Here, you can make adjustments to ensure everything is tailored to your needs.

Additionally, you can contently delete a device.

## Quick Start

Add a device

Scan

### Step 1 out of 6:

Go to the **homepage** and click on the “**Add a device**” button.

### Step 2 out of 6:

Click on the “**Add with Bluetooth**” button.  
**Activate** your Bluetooth on your settings.

### Step 3 out of 6:

Create a name for your device.  
Click on the “**Scan**” button.

### Step 4 out of 6:

With the camera of the app, target the QR code on the **device's box**.

### Step 5 out of 6:

Remove the **plastic** element to turn on the device.

### Step 6 out of 6:

Go on your **list of devices**.  
Press the “**Activate**” button.

**Your device has been successfully added.**

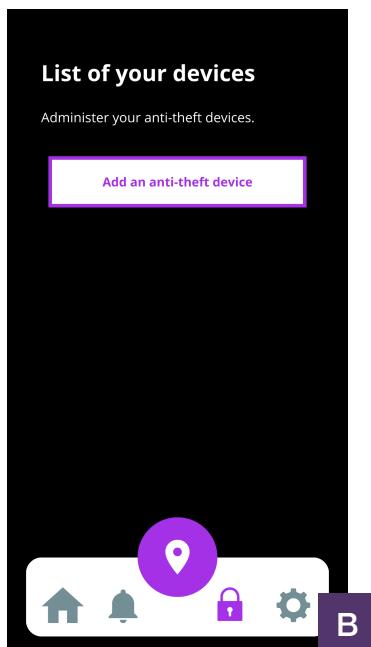

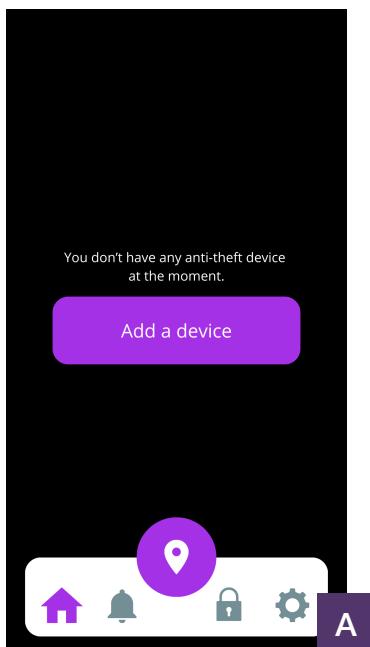

More information about the installation page 9.

## Add a new device

Welcome to the section dedicated to adding a new device to your anti-theft system. Whether you're expanding your security network or replacing an existing device, the process is straightforward and hassle-free.

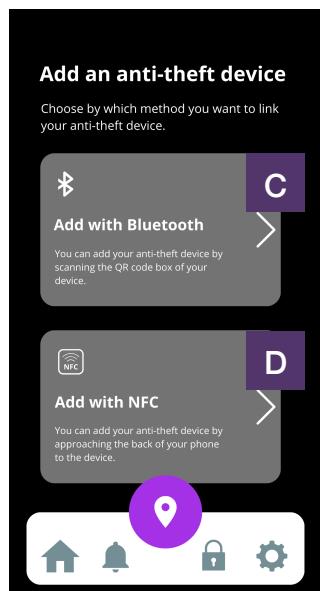

Below, we outline the steps to seamlessly integrate a new device into your system, ensuring continued protection for your belongings.

1

To add an anti-theft device to your application, you have two possibilities:

- From the homepage: A
  - If this is the first device you're adding, you can do so directly from the homepage.
  - Look for the "Add a device" button and click on it.
- From the list of devices tab: B
  - If you've already added one or more devices, you can add another from the list of devices tab.
  - Simply navigate to the list of devices tab and locate the "Add an anti-theft device" button.
- Clicking on both buttons will direct you to the tab for adding a new devi2.

2

To link your device, you can utilise two methods:

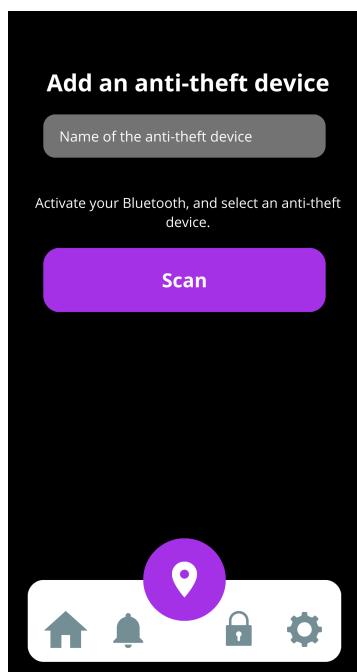

- Bluetooth:
  - If you choose to link your device via Bluetooth, you will require the QR code located on the device's packaging. This QR code serves as a unique identifier to establish the connection between your device and the application.
- NFC:
  - Alternatively, you can use Near Field Communication (NFC) technology to link your device. To utilise NFC, your smartphone must have NFC integrated.

*See more information about NFC on page 21.*

Select the method that best suits your preferences and device compatibility for seamless integration with the anti-theft application.

# SportShield Manual

## Add a new device

3

The next step is to create a name for the device.

You can choose any name you like, but it's important to be careful when selecting it to avoid confusion, especially if you have multiple devices.

Consider naming them based on their purpose or any other distinguishing factor that helps you easily identify them.

Next, you have to turn on your Bluetooth.

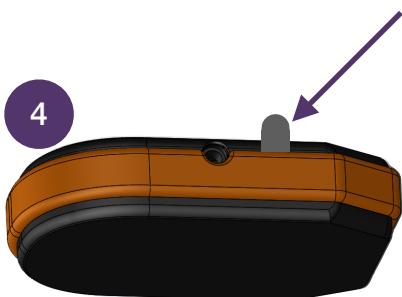

At this point, you have a camera of the application open.

4

Take out the device from its box.  
Remove the plastic element

By removing this plastic, you will allow the device to turn on.

Now, go back to the application.

4

5

Bluetooth

Inside the device's box, you will find a QR code, you need to point the camera at the QR code.

6

NFC

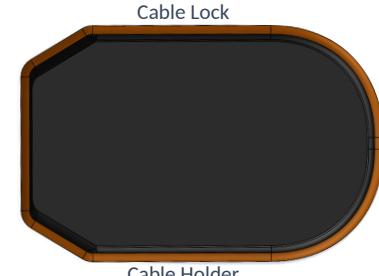

If you choose this option, your phone should have NFC capacities.  
Tape the back of your phone on the device to connect via NFC.

Once connected, you should see a message saying  
"Device [name] added".

5

6

# SportShield Manual

## Activate the device

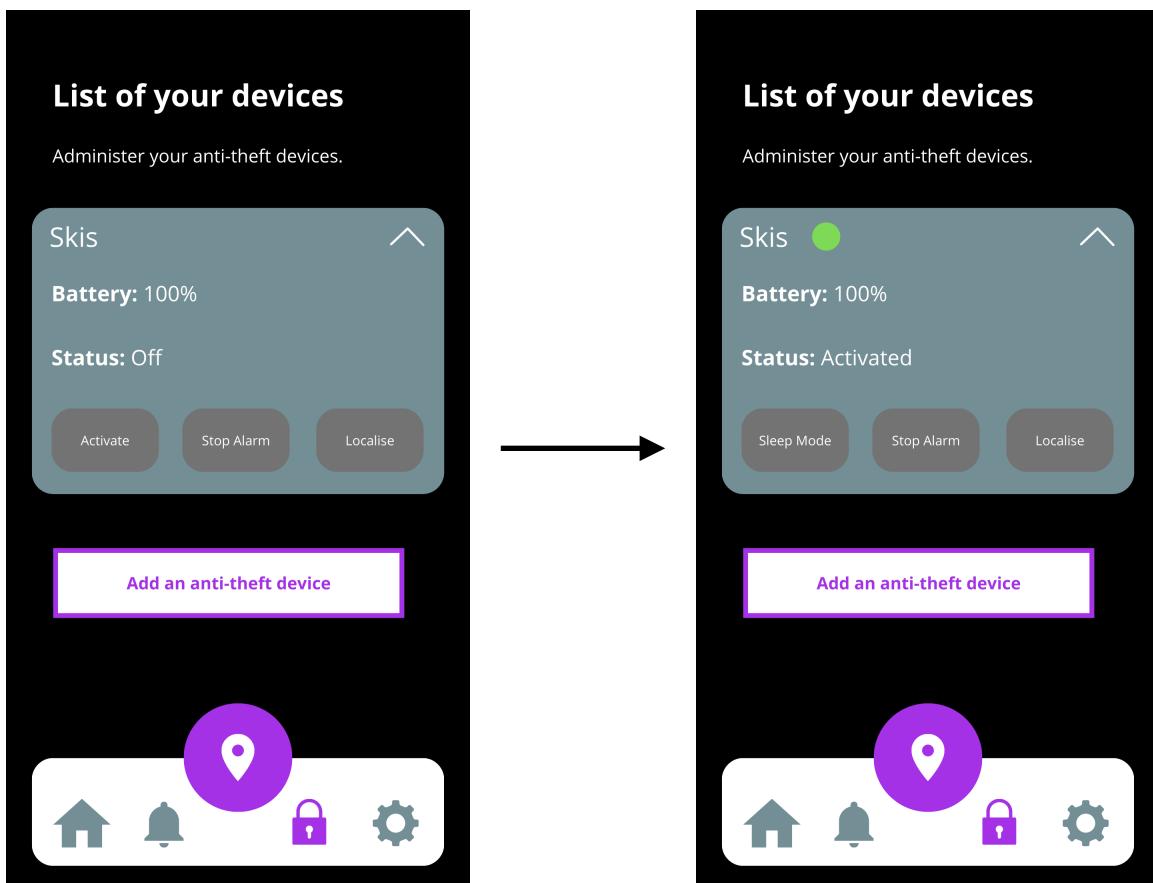

Before proceeding with the activation steps, ensure that you have added this device to the application.

Refer to the tutorial page XX for instructions on adding a new device. Once added, follow the steps below to activate your anti-theft device and enhance the security of your belongings.

To activate your device, you need to:

- Go to "List of your devices".
- Click on the device you want to activate.
- Click on the "Activate Button".

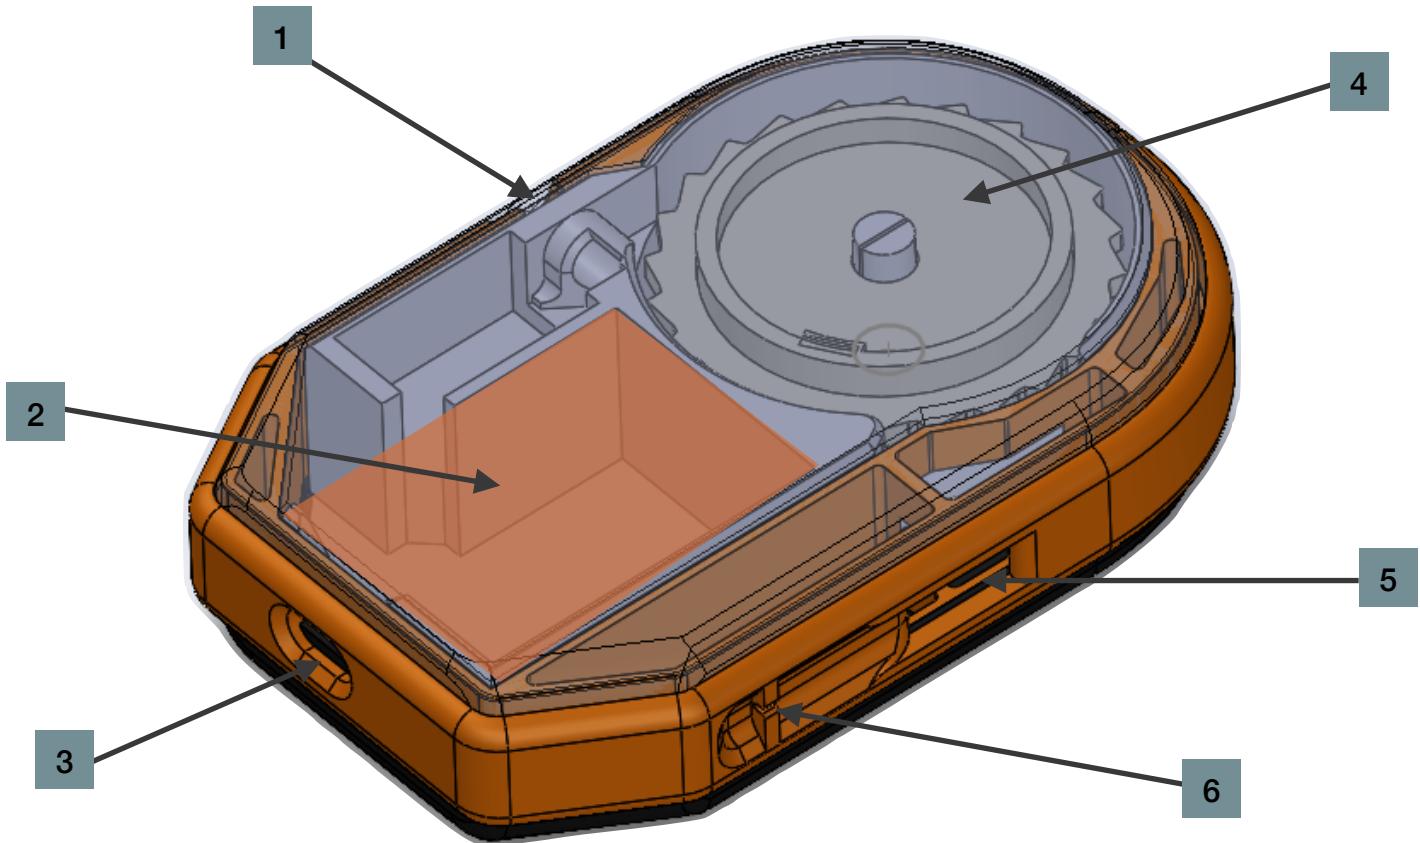

Your device is now activated.

See page 13 to learn how to use the anti-theft.

# SportShield Manual

## SportShield Device

### 1 Cable Lock

The magnetic lock of the device. Where the cable needs to be inserted to lock the device.

### 4 Cable Wheel

Where the cable is rolled. Permit to tighten the cable during the locking.

### 2 NFC Reader

Where you need to place your phone for the connection by NFC.

### 5 Cable Exit

Where you will pull the cable before the locking.

### 3 Charging Port

Port to charge the device.  
USB-C cable, supplied in the box.

### 6 Cable Holder

When the device is not used, you can wedge the extremity here.

# SportShield Manual

## Anti-theft Locking

Welcome to the anti-theft locking section, where you'll learn how to safeguard your valuables with our locking feature.

In this segment, we'll guide you through the process of placing the anti-theft device securely on your belongings.

Before following these steps, make sure your anti-theft device is added to the application and is activated.

Example:

- Place the device in the back of your snowboard
- Roll the cable around your snowboard
- Put the latch in the cable lock

**Your anti-theft is now automatically locked!**

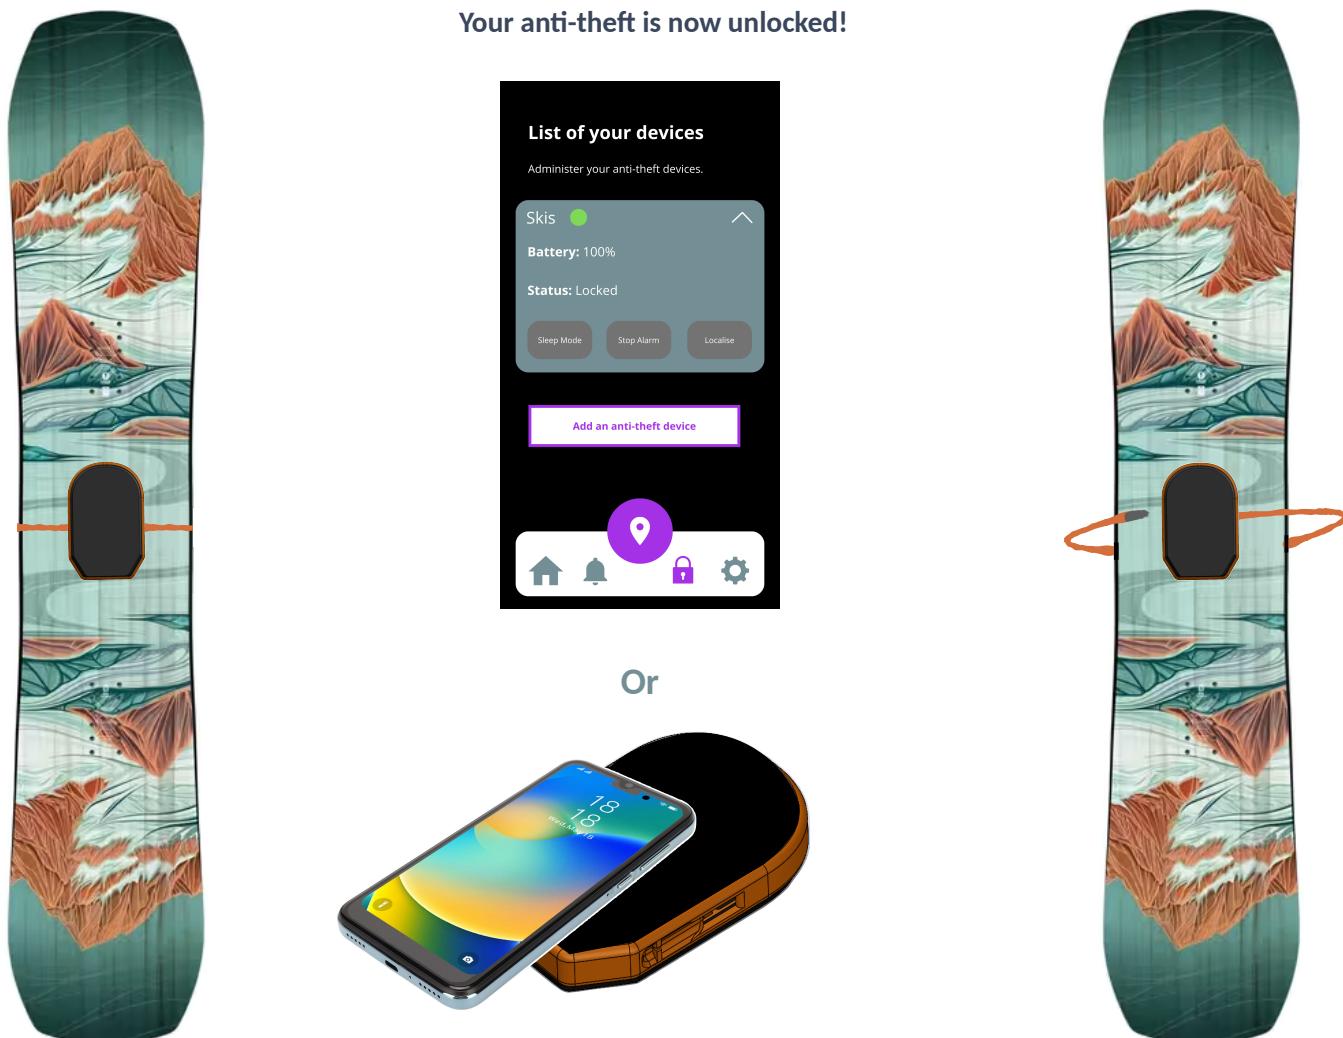

# SportShield Manual

## Anti-theft Unlocking

Unlocking your anti-theft device is a simple process, ensuring quick access to your belongings whenever you need it. Follow the steps below to unlock your device:

- **Using NFC:**
  - To unlock your device with NFC, simply tap your phone or the NFC card on the device.
- **Using the App:**
  - Open the SportShield application on your smartphone.
  - Navigate to the list of devices.
  - Select the device you want to unlock.
  - Tap the "Stop alarm" button to deactivate the alarm and unlock the device.

Following these steps will allow you to unlock your anti-theft device effortlessly, providing you with easy access to your belongings.

# SportShield Manual

## Sleep Mode

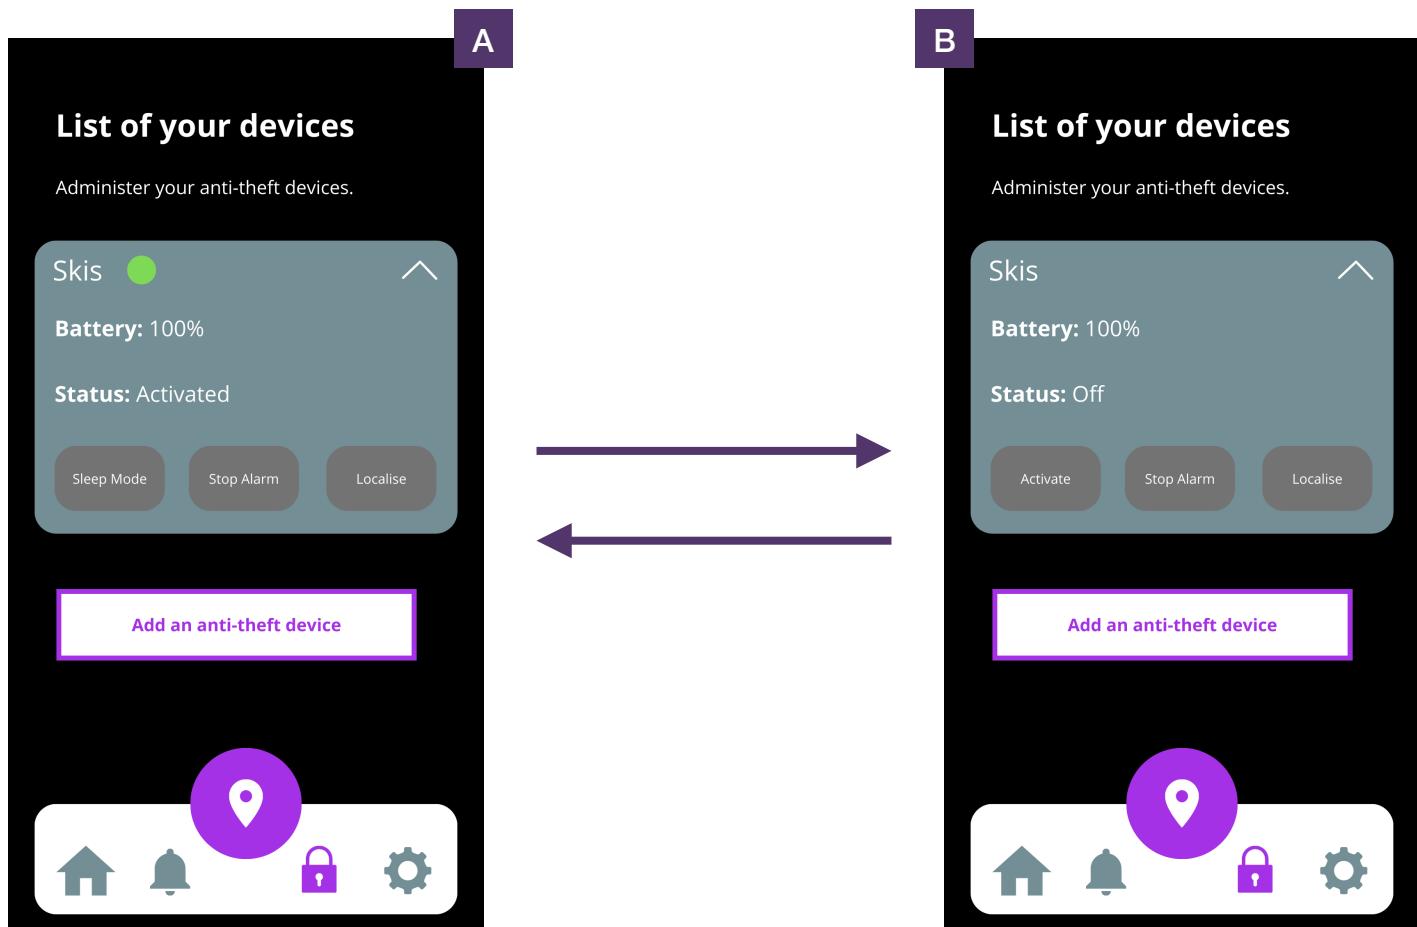

This page is dedicated to scenarios where you want to switch between the activate and the sleep mode. For these actions, you should be located on the “List of your devices” tab.

### From activate to sleep mode: A to B

- By clicking on your device, you will see the page **A**.
- Press the button “Sleep Mode”, which will turn into “Activate”

### From sleep to activate mode: B to A

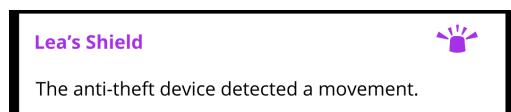

- By clicking on your device, you will see the page **B**.
- Press the button “Activate”, which will turn into “Sleep Mode”

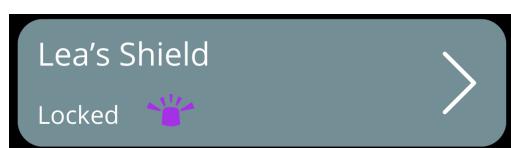

# SportShield Manual

## Theft Mode

This page is dedicated to scenarios where someone attempts to steal an item protected by one of our anti-theft devices.

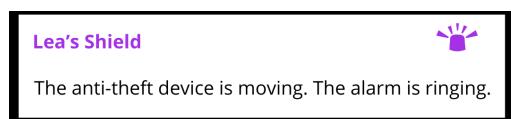

When the anti-theft detects a moment when locked, it will ring a short alarm to discourage the potential theft.

You will see an alarm icon next to the anti-theft that is ringing. At every moment, you can check the location of your device.

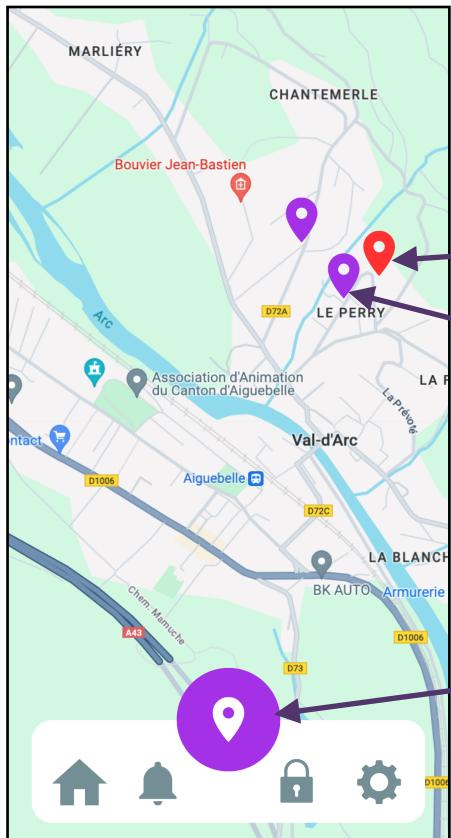

If the alarm doesn't ring in the following minutes, it's because there are no more movements.

If there is another movement in a short time:

- A louder and longer alarm will ring,
- A new notification will be sent,
- You will see on the map the device in red with the precise location of your device.
- The alarm won't stop ringing till the device stops moving.

The alarm can be stopped at every moment from the application.

The device that is moving.

Devices that are not moving.

On the map tab.

# SportShield Manual

## Remove Device

This page is dedicated to removing a device from your SportShield application. Follow the steps below to remove a device:

- Go to the settings tab of the application.
- Select the "Remove device" option.
- Delete the device that you want to remove.

After completing these three steps, your device will be restored to factory settings. It will no longer be accessible through the application but can be sold or used with another account if desired.

## Sell Device

If you intend to sell the device, ensure to provide the following to the future user:

- The NFC card.
- The box with the QR code.
- The charger.
- The device itself.

This ensures that the new user has all the necessary components to set up and use the device effectively.

# SportShield Manual

## Utilisation Advice

To maintain the durability and effectiveness of your device, consider the following recommendations:

### 1. Preserve battery life

It's advisable to avoid completely draining the device's battery. Regular charging helps sustain optimal power levels.

### 2. Utilise sleep mode

Activate sleep mode when the device is idle, particularly if you anticipate using it again shortly. This conserves energy, especially for repeated use within a short timeframe.

### 3. Power off during inactivity

When not in use for extended periods, switch off the device. This practice conserves battery power and minimises unnecessary energy consumption.

### 4. Carry the NFC card with you

Keep the NFC card with you, especially in scenarios where your phone's battery may deplete. This ensures continued access and functionality of the device, even without a smartphone connection.

### 5. Assign distinctive names

Assign unique names to each device to mitigate confusion and prevent inadvertent actions on the wrong device.

### 6. Avoid simultaneous charging and usage

It's advisable to refrain from charging the device while it's in operation. Disconnecting it from the charger during use helps prevent potential damage.

### 7. Charging only with the provided charger

Ensure to charge your device only with the provided charger. Using incompatible chargers may lead to damage or reduced performance.

### 8. Retain device packaging

Retain the original packaging of your device. It serves practical purposes such as storage, transport, selling and warranty-related matters.

By adhering to these guidelines, you can optimise the performance and durability of your anti-theft device, thereby ensuring effective protection for your belongings.

# SportShield Manual

## Frequently Asked Questions

### Can I have multiple device on my phone?

- Yes, you can add as many devices as you want.
- See page XX for more details on how to add more devices.

### Can my device be on multiple phones?

- For security purposes, you can't add a device on multiple phones.

### Can I remove a device from my application?

- Yes, you can remove it from the settings tab.
- See page XX for more details on how to remove a device from your phone.

### Can I sell my device?

- To be able to sell your device, you only need to remove it from your phone.
- See page XX for more details on how to reset your device.

### Is there a warranty? And how long?

- Yes, our product has the CE norm that assures you a warranty of two years.
- To be eligible for the warranty, no modification should have been made to the device other than the Coris Innovation company.
- To send back your device, in case of missed confection, we need the device, the charger, the NFC card and the box.

### What happens if my anti-theft is locked and I don't have battery on my phone?

- Your anti-theft will stay locked.
- To unlock your device you can use the NFC card provided with the box to unlock your anti-theft.
- If you don't have the NFC card with you, you will need to recharge your phone.

### What happens if my anti-theft is locked and it runs out of battery?

- In that case, the lock remains locked. To unlock it, you can use the NFC card, or your phone to unlock it.
- See page XX for more details.

### Can I add a device of another brand to the application?

- No, the SportShield application only accepts the anti-theft of Chris Innovation.

### My anti-theft doesn't charge anymore?

### My lock doesn't lock anymore?

- To provide the right repair, please send your device back to Coris Innovation.
- See page XX for more details.

### I can't add a new device on my phone.

- Verify that the device is not linked to another phone.
- If it still doesn't work, please contact Coris Innovation customer service.

# SportShield Manual

## Glossary

**Magnetic:**

The anti-theft device utilises magnetic technology for secure attachment to surfaces.

**Norme CE:**

Conformité Européenne, indicating compliance with European health, safety, and environmental protection standards.

**Waterproof:**

The anti-theft device is designed to be waterproof, providing protection against water damage in various environments.

**USB-C:**

The device features a USB-C port for convenient charging and data transfer.

**NFC (Near Field Communication):**

A short-range wireless technology that enables communication between devices when they are brought close together.

**Bluetooth:**

A wireless technology standard for exchanging data over short distances.

**iOS:**

The operating system developed by Apple Inc. for its mobile devices, such as iPhones and iPads.

**Android:**

The operating system developed by Google for mobile devices, such as smartphones and tablets.

**QR Code:**

A type of two-dimensional barcode containing encoded information that can be scanned and read by a smartphone or other devices.
